

EARLY EDUCATION MATTERS

Developing early literacy skills can promote academic and career success later in life. Your library can be the first step toward that goal by delivering an educational program that introduces children ages three to six to key concepts in math, science, social studies, language and literacy, art, and music.

Miss Humblebee's Academy is an interactive kindergarten-readiness solution that's as challenging as it is fun. While preschoolers stay engaged, libraries and parents stay informed with measured learning outcomes.

GIVE PRESCHOOLERS A STRONG FOUNDATION FOR LEARNING

ASSESS COGNITIVE SKILLS

Children begin with a 15-question cognitive assessment to establish their baseline, and subsequent assessments are given periodically to provide insight into progress.

MEASURE SUCCESS

Libraries receive three monthly reports giving insight into early literacy development in their communities. Parents receive weekly email notifications to view progress and performance reports, which identify strengths, pinpoint trouble spots, and show improvement.

OFFER DEVELOPMENTAL RESOURCES

Includes resources for parents such as an age-related developmental milestone guide and an observation checklist.

DEVELOP OFFLINE SKILLS

Children can practice with writing tools and learn away from the computer with twenty percent of the curriculum available as printables and practice worksheets.

MAKE EDUCATION EXCITING

Children create a personalized avatar and earn incentives for moving through each highly interactive lesson. Virtual awards can be used in the Puzzle Room, Sticker Room, and Honeycomb Shop.
