

To transform your classroom, just

CLiC

With *CLiC* (Classroom In Context), teaching and classroom instruction becomes interactive, personalized, and focused. This digital-based curriculum, designed by Gale, a leading educational provider, is flexible allowing teachers to make their classroom more interactive, as well as support the different learning styles and proficiency levels of students. *CLiC* is pre-loaded with a specific scope and sequence for the year, yet still allows teachers to customize with additional articles, other licensed school resources, eBook content, periodicals, videos, podcasts, images, and teacher-created materials.

Teach with Trusted Content and Succeed.

INSTRUCTOR VIEW

CLiC gives learners a more conceptual understanding of core subjects, and meets state, national, and Common Core standards. *CLiC* also makes learning more investigative and discovery based. It is the ultimate blended learning experience for both teachers and students.

CLiC curriculums draw content from Gale's award-winning, dynamically updated *In Context* databases. *In Context* provides accredited information and authoritative content to meet today's education standards.

STUDENT VIEW ▶

Transform your classroom with *CLiC* today.

CLiC lightens the load for your students.

With CLiC, students can lighten their load by carrying fewer textbooks. CLiC can be used on any device, mobile or laptop, and provides authoritative and diverse content from six popular subject areas.

Gale can even work with teachers and librarians to develop specialized CLiC curriculums for schools and districts with specific requirements such as AP classes and non core curriculums.

So give your students a powerful tool that motivates them, and promotes learning on every level.

Google makes a great study partner.

Gale's ability to improve classroom learning is made even more robust through the relationship with Google. As a Google for Education partner, Gale uses well-recognized G Suite for Education tools, including Google Drive and Docs, to support students as they develop key research skills. With just a simple sign-in to their Google Account, students and teachers can easily share and download articles, including highlights and notes.
