

THEMATIC OUTLINE

This outline is divided into three sections: **1. Disabilities and Conditions**; **2. Format or Genre** (to capture categories other than “memoir” or “autobiography,” which encompass most works in this collection); and **3. Themes**. Within each section, the memoirs discussed in this work are classified under various categories in order to give an overview of the variety of works and the breadth of subjects treated in this work. Along with the subject index at the back of the book, the thematic outline should aid in the location of topics or themes, as discussed in the preceding piece, “Disability Experiences in the Classroom.” Because the category headings are not mutually exclusive, many entries are listed in more than one category in each section.
