## *Making of the Modern World, Parts I and II*

While *ECCO* provides a very comprehensive view of the eighteenth century through the eyes of the British, *Making of the Modern World* provides a more global perspective and greatly expands upon the time period covered—both forward and back.

Likewise, a world history survey class requires more than just eighteenth century coverage, and these collections provides material from 1450-1914, covering most major events and topics in world history.

Even for eighteenth century events, *Making of the Modern World* presents perspectives from countries other than England and offers insight into events and movements that preceded or followed eighteenth century events.

*Making of the Modern World* is also the most global of Gale's main digital collections in terms of content with well over a third in non-English languages.

## Example:

When it comes to the study of India, much occurred during the eighteenth century; however, *Making of the Modern World* provides a wider view of trade with India that preceded the East India Company's rule as well as the nineteenth century rebellion.

*Sabin Americana, 1500-1926*

While *ECCO* has a considerable amount of material about America in the eighteenth century, *Sabin Americana* adds substantially to that coverage, along with materials back to the time of the discovery of the Americas right on through the early twentieth century.

Because this collection features a wealth of books and journals about the Americas, regardless of where they were originally printed, it adds significantly to the time and geographical coverage of *ECCO*.

*Sabin Americana* is also a wonderful resource for both Latin America and Caribbean area studies. In addition to the materials Europe published regarding these areas, it also houses some of the earliest publications from those regions.

In particular, slavery in the Caribbean and Americas is extremely well-covered, extending right up through the aftermath of the Civil War. In fact, slavery has proven to be one of the most studied topics across a range of disciplines, and *ECCO* provides only a sliver of the perspective that both *Sabin Americana* and *Making of the Modern World* offer in addition.

*The Making of Modern Law*

Covering a critical era in the development of Anglo-American law and legal practice, *ECCO* contains more than 9,300 titles directly relating to legal history, including multiple editions of English legal classics such as the works of William Blackstone, Richard Burn, and Edward Coke. For those wishing to expand upon legal-themed research, *The Making of Modern Law* offers a particularly robust complement to *ECCO*.

The following *Making of Modern Law* collections will prove especially useful to eighteenth century researchers:

- *Trials*: Invaluable trial literature offers insight into social history for cases involving treason, sedition, murder, libel and slander, and courts-martial.
- *Legal Treatises*: Because *ECCO* offers myriad connections to the legal archives, especially the medieval roots of British common law, its connection to Legal Treatises is fundamental.
- *Primary Sources, I and II*: These primary source collections complement and enhance *ECCO*'s insights into the medieval roots of British common law.

## Nineteenth Century Collections Online

*Nineteenth Century Collections Online*—or *NCCO*—is a natural companion to *ECCO*. Faculty research rarely stops at the end of a century, but rather follows topics or events that overlap the centuries. Similarly, and perhaps more often, teaching and course requirements often extend across century boundaries.

For all of the success and attention that *ECCO* has received, most universities will have an even larger number of nineteenth century scholars that will find *NCCO* essential to doing comprehensive research on this key century.

*ECCO* is a very comprehensive view of the eighteenth century through the eyes of the British; *NCCO* expands upon the time period covered and greatly expands the point of view with materials sourced from around the world.

### Examples:

- Romanticism
- Study of the British Empire
- Support for area studies in Asia, Africa and Latin America

The addition of *NCCO* and the tools found in *Gale Artemis: Primary Sources* allow researchers to track trends across the centuries for an accessible and holistic research experience.

## Smithsonian Collections Online

Gale and the Smithsonian Institution have partnered to give libraries a unique opportunity to provide students, faculty, and researchers access to content deep within the Smithsonian museums, libraries, and archives.

*Eighteenth Century Collections Online* offers considerable detail on the topics of trade and business, as well as the industrial revolution and advancements in technology and science. Both of these topics can be supplemented in considerable detail through the Smithsonian collections, *Trade Literature and the Merchandizing of the Industry and World's Fairs and Expositions: Visions of Tomorrow*.

The *Trade Literature* collection provides an insightful look into how businesses portrayed their products to the markets, providing detailed descriptions of various product lines within those industries. In the process, detailed histories of companies are provided along with a history of technological advances. *World's Fairs and Expositions* takes this further with insight into technological changes that were cutting edge at the time, as well as materials on architecture, industrial design, and much more.
