The Times is one of the most cited newspapers in the world, and holds immense value as a historical resource for researchers in diverse subject areas. The Times Digital Archive provides access to the full run of one of the world’s most important newspapers, with an unrivalled reputation for covering national and global news.
SEARCH AND VIEW EVERY PAGE OF THE WORLD’S “NEWSPAPER OF RECORD”

Read by both world leaders and the general public, since its creation in 1785 readers have turned to The Times for its in-depth, award-winning coverage. Although based in the UK, it has reported extensively on international events for over 225 years, alongside its coverage of national news. Over the last century, it provides a counterpoint to other emerging rival newspapers, especially the Daily Mail, which focused on the “everyman” [and woman]. In the past few decades The Times has expanded its sports and cultural coverage through an increase in weekend supplements, as well as an increased page count of individual issues.

* Each year, this archive receives an update, adding another year of content.

LONG-RANGE COVERAGE
Research perspectives and opinions before many other newspapers were founded, giving a broader and longer ranging insight into mass media representations of history

NOT JUST THE NEWS
Provides access to supplements and magazines, broadening research opportunities into wider subject areas, ranging from (but not limited to) arts and culture to sports and property

AN INFLUENTIAL VOICE
See how different target markets effect journalistic styles, the presentation of stories, and what was considered “news”

CROSS-SEARCH FOR NEW CONNECTIONS
This archive is cross-searchable with other Gale Primary Sources collections, opening new avenues for digital humanities scholarship and uncovering new and innovative research

A MULTIDISCIPLINARY RESOURCE
- Arts and Culture
- Business and Economics
- Politics and International Relations
- Science and Technology
- Social History

FEATURES AND TOOLS

Term Frequency
See the frequency of search terms within a content set to begin assessing interactions and how they developed over time.

Term Clusters
Developing research topics by identifying and organising frequently occurring themes, and revealing hidden relationships between search terms.

Text & Data Mining
At request, Gale will deliver data and metadata associated with the collection for use in data mining and textual analysis, supporting the digital humanities.
